OBJECTIVE

Develop and maintain integrity on interfaces for sites, software, and interactive systems as Product Designer and User Interface Developer, and filling the gap between Designers and Developers.

EXPERIENCE

Lead Product Designer & UI Developer

SAI Global (US/Netherlands)

Jan 2017 - Apr 2020 | Remote

- Developed highly interactive prototypes and shipped the same UIs on delivered product
- Worked closely with Product Owners and developer team to design and document features for SAI360 Digital Risk & SAI360 B Wise Vendor Risk Management
- Interfaced with other designers and developers in different timezones to ensure coherent UI/UX across five different products with different technologies
- Developed Style Guides for multiple different products and technologies

UI/UX Designer & FrontEnd Developer

Modulo Security Solutions (Brazil)

Oct 2012 - Dec 2016 | Partially Remote

- Write modern, maintainable and performant code for Modulo Risk Manager
- Proposed and implemented a solution to make UIs more alike to the designed ones
- Worked with Rio's Public Security Stakeholders in Integrated Command & Control Center to bring a most efficient Interface for 911 operators
- Performed the layer between design and development, talking in the way that the developer understand
